EHR Implementation Roadmap

Success Stories

EHR Support for a Not-for-Profit Managed Care Organization

- Clinical Service Desk to liaison between the hospital's authorized end users and other support personnel
- Tier 1 and Tier 2 support services:
 - Maintaining required system design, build, and test documents
 - Configuration, monitoring, support, and testing new interface connectivity and performance issues

EHR Maintenance and Support for a Leading Provider in Massachusetts

Team of 150+ EHR experts providing:

- EHR support activities like managing the ticket monitoring system, providing support for upgrades, and facilitating downtime preparations and procedures
- Interface and Integration support activities like monitoring and troubleshooting interface connectivity and performance issues, resolving data mapping and conversion issues
- Development of customized reports per business needs
- Workflow support

EHR Integration with Care Management Platform using FHIR Connector

- Customization of EHR to create a new custom tab and display Connected Care applications in EHR
- Integration of EHR - using SMART on FHIR, to interact with Connected Care applications for resources used by modules such as Alert Service, Condition Validator, Care Gaps, and Medication Adherence

GS Lab | GAVS is a global technology company focused on creating business impact for its 200+ customers across the USA, Europe, the Middle East, and APAC. It offers digital product engineering, AI-led managed services, and digital transformation services to customers across BFSI, healthcare, communications, and high-tech segments. With 4000+ technologists and a strong talent grooming engine, it is a trusted growth partner to its customers.

The company focuses on deep tech engineering skills, innovative win-win business models, and customer success. Its IPs, such as ZIF™, zIrrus, Rhodium, and zDesk, help accelerate technology adoption and reduce inefficiencies in operations.
